**STAR  
WARS**<sup>™</sup>

In the spirit of doing the never been done, with our emphasis on the details, this season we are proud to introduce the STAR WARS | Nixon Collection, the best watches and accessories in the galaxy. Constructed around decades of making the little stuff better, we're driven to create custom products to reflect our unique point of view for the life we live and the life we admire.

Translated into a collection of thoughtfully designed watches and accessories, the STAR WARS | Nixon Collection looks to honor the legacy and the innovative ideas of forward-thinking, game-changing individuals who brought it to life. The following pages capture this point of view and showcase the unprecedented storytelling that STAR WARS represents in original ways and are unlike anything you've seen before. Welcome to the new.

## Details Matter Most.

They drive us, we pay attention to them. It's the intricacies that you may not notice at first glance, but can't be ignored. Created for those who know, these subtleties can be found throughout the STAR WARS | Nixon Collection. It's the design details on the bezel and pushers, dials and bands, the color applications and storytelling references found in these details that bring to life the unique characteristics only found in the STAR WARS | Nixon Collection.

## STORMTROOPER

---

Imperial stormtroopers are highly trained soldiers of the Galactic Empire. These elite shock troops are deployed in overwhelming numbers to carry out the Emperor's will and maintain oppressive order throughout the galaxy. Stormtroopers are feared by Rebel freedom fighters because of their militaristic obedience and their unwavering commitment to the Emperor. Armed with standard Imperial blasters, stormtroopers wear anonymous white armor over black body gloves. The two-piece body glove is temperature controlled for survival within harsh environments, and the outer armor protects from projectile weapons and shrapnel, but provides limited protection from blaster fire. A stormtrooper's suit also contains a utility belt equipped with a comlink, grappling hook, handcuff binders, and macrobinoculars.

## IMPERIAL PILOT

---

The Empire's black-suited pilots fly the full range of TIEs, including fighters, bombers, interceptors, and experimental models. Only a small minority of cadets in the academy's pilot training program actually graduate with commissions. They comprise an elite class within the Imperial Navy and have a notorious superiority complex. Nonetheless, they make great sacrifices. TIE fighter pilots are trained to complete their missions at all costs, disregarding their own survival.

## DARTH VADER

---

Darth Vader is a Dark Lord of the Sith responsible for wiping out the Jedi and executing the Emperor's evil bidding. Feared by Rebels and Imperials alike, Darth Vader is a terrifying union of man and machine hidden beneath black robes and forbidding armor. Determined to hunt down and extinguish the Rebel Alliance, Vader commands the massive Imperial fleet and rules his forces through unquestionable terror. Once, this ominous figure was a young Jedi apprentice named Anakin Skywalker who trained under Obi-Wan Kenobi to become a Jedi. Too impatient with his Jedi Master and consumed with anger and aggression, Anakin chose a path that could only lead to the dark side. He emerged as the villainous Darth Vader. When Vader discovers that one of the Rebellion's greatest heroes is his son Luke Skywalker, he tries to lure him to the dark side, but Luke refuses and barely escapes with his life. When Vader and his son meet again, Luke is a Jedi, like his father before him. In their final struggle, while Luke writhes in agony at the hands of the Emperor, Anakin Skywalker emerges from the darkness and sacrifices himself to save his son. Through his redemption, Vader's reign is ended, and Anakin Skywalker is once again part of the light side of the Force.

## BOBA FETT

---

The mysterious Boba Fett is the most notorious bounty hunter in the galaxy. Well paid and highly sought after, this infamous mercenary scours the galaxy for profit and personal reward while leaving an indelible mark on all whom he encounters. Frequently employed by the crime lord Jabba the Hutt, Boba Fett is also commissioned by the Sith Lord Darth Vader. Fett is one of six bounty hunters hired to track down the smuggler-turned Rebel Han Solo. It is Fett's shrewd calculations and stealth that allow him to best his criminal colleagues. He leads Vader to Cloud City, where the Rebel heroes had sought refuge from the Empire's impending forces. On the floating city, Han Solo is frozen in carbonite and placed aboard the bounty hunter's personal starship Slave I. After collecting his reward from the Empire, Boba Fett returns to Jabba the Hutt to collect yet another bounty on his prized cargo. However, Boba Fett and his ruthless Hutt employer underestimate the strength and determination of Han's friends, whose rescue efforts erupt into an explosive battle that destroys Jabba the Hutt and his vile court.
